

EPITHOS is a leader in IIoT services, helping organizations increase operational efficiency, reduce costs, and enhance productivity by leveraging real-time data collection and Predictive Analytics.

PowSave is a real-time electrical energy monitoring and tracking system designed to analyze and manage electrical energy consumption for maximum efficiency.

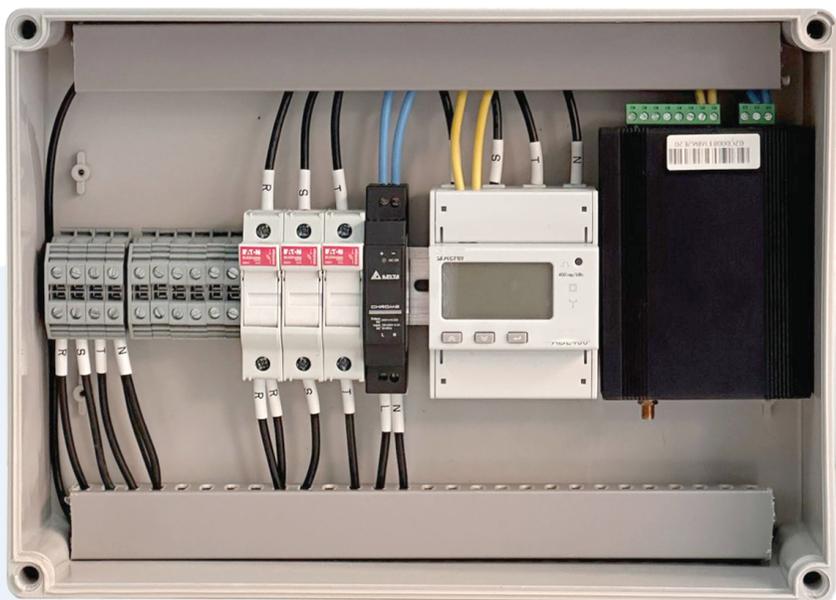

## Capabilities

- ✓ Monitor electrical energy consumption in Real-Time.
- ✓ Analyze data to forecast energy usage trends.
- ✓ Receive instant alerts when anomalies are detected via  or E-Mail
- ✓ Monitor electrical energy consumption in Real-Time

## Benefits

- ✓ Reduce electricity costs through efficient energy management
- ✓ Detect equipment and machinery anomalies immediately
- ✓ Forecast electrical energy consumption in advance
- ✓ Prevent electrical fires caused by short circuits
